Ace-K

Chemical overview

Chemical name	Ace-K	Synonyms and Related Compounds	Acesulfame K, Acesulfame Potassium, E950
CAS #	55589-62-3	Formula	$C_4H_4NO_4KS$
Specifications	Appearance: White crystalline powderÂ Assay: 99.0% - 101.0% Analysis Standard: FCC/USP/BP/Ph. Eur. Kosher, Halal, Non-GMO, Vegan, Gluten Free, Dairy Free		
Packaging	25 kg net weight carton with two inner plastic linings and vacuum-sealed bag.		
Applications	Beverages, fruit juices, tabletop sweetener, protein powder, dairy products, chewing gum, toothpaste, desserts, sauces, baked goods		
Description	Ace-K is an artificial sweetener 200 times as sweet as sucrose and commonly blended with sucralose and aspartame. Its stability at high temperatures allow Ace-K to be used in baking application where aspartame would be unsuitable.		

Please reach out to Suzhou-Chem Inc. with any question regarding Ace-K. We would be happy to provide a quote, a sample, or further information regarding its uses and availability.
