Sodium Ascorbate

Chemical overview

Chemical name	Sodium Ascorbate	Synonyms and Related Compounds	L(+)-Ascorbic acid sodium salt, Vitamin C sodium salt
CAS #	134-03-2	Formula	$C_8H_7NaO_6$
Specifications	Appearance: White to slightly yellow crystalline powder Assay: 99.0% - 101.0% Analysis standard: FCC/USP/BP/Ph. Eur. Kosher, Halal, Non-GMO, Vegan, Gluten Free, Dairy Free		
Packaging	25 kg net weight carton with two inner plastic linings and vacuum-sealed bag.		
Applications	Vitamin supplements (capsules, beverage), curing agent, antioxidant, anti-browning agent, color stabilizer, a bread improver, beer clarity improver.		
Description	Sodium ascorbate is a salt and a buffered form of ascorbic acid. The addition of sodium to ascorbic acid may reduce gastrointestinal distress. Humans obtain Vitamin C through a diet containing of citrus fruits, vegetables, and supplementation to maintain core biological functions. Vitamin C dissolves readily in water and has a tart taste.
